## **Magnetone Introduces Perfect Solution For Toner Cartridge Packaging**

*New airbag features innovative design, enhances product image and maximizes protection for toner cartridge*

**Singapore, February 9, 2006:** Magnetone introduced airbag, an exceptional packaging that offers optimum damage protection for toner cartridge. The airbag is made of 100% environmental friendly materials, comprising of 99% air and 1% special PE/PA quality film, and utilizing air columns as cushion against pressures of up to 120kg.

Magnetone airbag is the perfect combination of innovative design, comprehensive protection and ease of use. The airbag comes in 2 styles – Black and Clear, and available in 3 sizes – small, medium and large. Equipped with excellent supporting features in the form of air columns, the airbag is strong and has high humidity resistance. Each bag comes equipped with inlet that can be inflated quickly with air compressor and seal up automatically once inflation is completed. An added advantage comes in the form of reusability, which is applicable for the clear-style airbag. Unlike the clear-style airbag, the black airbag requires heat sealing that incorporates enhanced protection, while retaining other functionalities of lightweight and easy usage.

Magnetone is one of the fastest growing and largest stockists and distributors of compatible toner cartridge components for the remanufacturing industry in the region. The company constantly strives to meet the demands brought by the rapidly advancing printer technology.
