PRESS RELEASE

Product Focus – MAGWORKS CHEMICALS – Unique Formulations By Magnetone Singapore

Wide range of chemicals applicable on various cartridge components.

Singapore, August 3, 2006: Many rechargers have benefited from the use of MAGWORKS CHEMICALS, which contain unique formulations specially created by Magnetone Singapore since 2000. Be it for cleaning, coating or lubricating, MAGWORKS' efficiency and reliability ensures remanufacturing with ease and peace of mind.

In particular, MAGIXCOAT-the mag roller coating chemicals from Magnetone, has extraordinary durability and stability, with the potential to significantly increase the added value of the coated mag roller. Extensive research carried out by the R&D department at Magnetone guarantees that the MAGIXCOAT mag roller coating solution has exceptional wear resistance, combined with stable and even charge properties.

Here's how easily it works:

1. All chemicals require only a simple 2-step application procedure.
2. No special tools or experience required.

Built upon Magnetone's relentless pursuit of 100% reliability and performance, MAGIXCOAT is thoroughly tested and guaranteed to make components last for at least one cartridge cycle.

The current range of MAGWORKS chemicals includes MAGIXCOAT (mag roller coating solution), MAGIXCLEAN (mag roller cleaner), PCR Cleaner, OPC Drum Cleaner, Conductive Grease and Wiper Blade Lubricant.

Magnetone is one of the fastest growing and largest distributors of compatible toner cartridge components for the remanufacturing industry in the region. The company constantly strives to meet the demands brought by the rapidly advancing printer technology, ensuring that its product offering exceeds customer expectations in terms of performance, consistency and compatibility. **Contact Magnetone**
