

## Installation Instructions for ML-1640/ML-2240 Toner Chip

### Issue 01

1. Press and hold the printer button for 5 seconds, until the status page is printed.
2. Please pay attention to the OS version:0.00.00.83/84 on the status page.

- a.) If number “83/84” appears on it, our chip will definitely work well and so you may proceed to install chip on cartridge.
- b.) If number “93” appears on it, our chip will not work in this printer as it is most likely manufactured in Dec 2009 or after. This new batch of printers are using a newer version of chip, which is still not available yet in the aftermarket.
- c.) If other numbers appear on OS version, please download the upgrade software from our website: <http://www.magnetone.my> and connect to printer to upgrade firmware.

**Important Notice:** If your Samsung ML-1640 or ML-2240 printers are manufactured during *May 2009 - Nov 2009* , please download the upgrade firmware for Samsung ML-1640 or Samsung ML-2240 printers before installing our chip.
